

SIMPLY CLEVER

ŠKODA

# ŠKODA OCTAVIA

The feeling of being amazed is as rare as it is joyful. To keep being surprised by things we don't have to change everything. Sometimes it's enough just to change the point of view and almost immediately be welcomed by wonderful moments that were previously hidden.

The **ŠKODA Octavia** is designed to create everyday amazement for those driving it. Its dynamic design is both elegant and modern at once. Its generous space is comfortable for everyone and everything. The car is a confident leap into the future, proven by its host of impressive features and assistant systems that keep every journey safe, smooth and entertaining.

As a member of the ŠKODA fleet, the Octavia model also offers numerous Simply Clever details and solutions. For example, the ice scraper, mounted on the fuel cap, is within reach if you need it.

It's a small detail but, just like in life, it's the little things that often make a big difference. And this thinking guides everything we do.

**That's Simply Clever. That's ŠKODA.**

And this is your ŠKODA Octavia. A car built to amaze you day after day, drive after drive.

The Octavia model **design** will attract your attention with its unique morphology, defined by clear lines, sharp-cut edges and clearly modelled surfaces. The ŠKODA design language is simple, precise and crystalline, lending the car harmonic proportions, high functionality and timelessness. The bodywork features a dominating **front grille with a chrome frame**, the shape of which highlights the **ŠKODA logo**. The grille continues with **headlamps** with characteristic cranking in the lower part. The arrangement of the individual front bodywork elements and their shapes underlines the car's charisma and its sporting spirit. The **LEDs for use as daytime running lights**, always in combination with Bi-Xenon headlamps, offer a distinctive and continuous band of light. Another attractive feature are the **black fog lamps with Corner function**.

Viewed from the rear, the car has a strikingly clear design. While a **robust bumper** evokes a feeling of safety, the **large 5th door** refers to practicality and excellent access to the luggage compartment. You will find a lot of elements on the rear bodywork that are typical of the ŠKODA cars: **ŠKODA logo, lettering and crystalline recessions** for the registration plate. (Photo shows combi version.)

The **rear lights**, the illumination of which creates a double C letter, are impossible to overlook. You can also choose highly luminescent and energy efficient **LED diodes**. (Photo shows liftback version.)

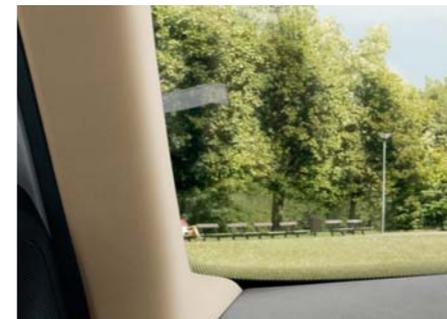

The harmony of the Octavia model design is most distinctive when viewed from the side, where its dynamics, elegance and sense of pragmatism find their common ground. Impressive elements include **chrome strips** around the side windows of the combi version (see photo) or in the lower part of the liftback windows, as well as **SunSet** windows with a higher density of tint in the rear part of the car. The **roof railings** for the combi version are available in exclusive silver or elegant black.

An exceptionally pleasant feature is the **two-part electrically-adjustable panoramic sunroof** of the combi version, which will bring more riding enjoyment to the whole crew. The whole sunroof can be covered with an electrically-adjustable net roll cover.

When you need to display a parking ticket in a visible place under the windscreen, the solution is simple. The car is equipped with a **parking ticket holder**.

You will find a **1.5-l bottle holder** in a spacious compartment in the front door. This is also where you can place a **removable waste basket**, which will help you keep the interior clean.

The green **ice scraper**, mounted on the fuel cap, is within reach if you need it and it's not a problem to replace it there when wet. Here you will also find **protection against incorrect fuel filling**, designated for cars with a diesel engine.

**Simply Clever** details and solutions as well as storage compartments significantly increase the practicality of the car. Namely, they simply multiply its transport options, help keep the car tidy, and make travelling more pleasant for all passengers.

The **multimedia bracket** located in the centre console is not only a practical accessory but also a safe place for transporting your iPod, mobile phone etc.

Another **Simply Clever** detail is located under the driver's seat. A special **pocket for a reflective vest** is located there, ensuring the vest is immediately within reach if you need it.

The undesired movement of luggage while driving can be avoided with **cargo elements**. These are two plastic parts with a Velcro fastener, which are located in the compartments behind the rear wheel arches when you do not need them. Another useful accessory is the **double foldable hook**, which you can use to keep full shopping bags upright.

For easier loading of large items into the liftback version, such as a child's bicycle, you can put the **luggage compartment cover in the retracted position**. After unloading it can easily be returned to its original position.

The **net programme** consists of one horizontal and two vertical nets, which will improve the variability of your luggage compartment. Both vertical nets are double-sided and can hold various small articles. In addition, we also offer you a **net under the luggage compartment cover** for the liftback version.

Everyone probably has the occasional need to load dirty luggage. The **double-sided carpet** in the luggage compartment is determined for such cases. You can use the carpet with the elegant fabric side up when not transporting anything that might make your car dirty, and can easily turn it over to utilise the washable rubber side when required.

The car's variability can be further increased by the **foldable backrest of the front passenger seat**, which allows you to adapt the interior configuration to your current needs.

The rear seats can be folded using a **remote release button** located in the luggage compartment of both the liftback and the combi versions, which will make loading the car even more effortless.

The **electrically-controlled 5th door** of the combi version is opened and closed automatically so you don't have to touch it, which you'll especially appreciate in rain or winter weather. It can be controlled from four different locations: a button on key with remote control, a button on centre console, an internal button on the 5th door panelling and an external Softtouch button. You may adjust the upper door position individually according to your needs.

The **mid-level luggage compartment floor** of the combi version facilitates easier luggage handling by placing the bottom of the compartment on the level of the loading edge. In addition, it provides a special storage space for transporting the roll cover or roof rack when it's not needed or in the way or can serve as a discreet storage area.

The practical **pocket under the roll cover** of the luggage compartment of the combi version can serve as a safe storage place for items that you would like to transport separately from other objects in the luggage compartment.

Unrivalled space for everything and everyone.

The vehicle offers **lots of legroom and headroom** for the driver and front passenger. The seating comfort in the front is further enhanced by an adjustable armrest.

You will enjoy the feeling of freedom and even greater space with the **panoramic sunroof**, made of tinted glass ensuring lower light transmission and thermal permeability. You can either tip it upwards or slide it backwards, creating an open space above the front seats of the liftback version.

The Octavia provides **extraordinary space even with full occupancy**. Up to three passengers can travel comfortably in the rear. Standard accessories include the Isofix and Top Tether belts for fixing child seats on the outer rear seats.

The **luggage compartment** parameters will simply impress you. The combi version offers **610 litres** (see photo) and the liftback **590 litres** and **1,740/1,580 litres** after folding down the rear seats. The Octavia can easily provide plenty of luggage capacity for a large family, no matter which version you decide upon.

The **storage pockets** on the rear of the front seats can conceal various articles, from books to toys, depending on who sits in the rear. Other things which you may want to take with you, including a 0.5-litre drinking bottle for children, can be placed in the **storage compartments** in the rear doors.

The driver and front passenger can use a practical **double drinks holder** in the centre console, which also contains other storage spaces.

The **sunglasses compartment** is located within reach of your hand above the interior rear-view mirror.

When using the **removable Unibag** designed for transporting skis or a snowboard, simply place it through the opening between the luggage compartment and cabin.

The manually controlled **roll blind** for the rear window of the liftback version can efficiently protect passengers in the rear seats against the sun.

The passengers' comfort in the rear seats is enhanced by a **tilting armrest with two drinks holders**.

The **hinged storage compartment** under the front passenger's seat is an ideal place for transporting minor articles, which you wish to have in the car, but not necessarily in visible sight.

Thanks to the **closed storage compartment** in the lower part of the dashboard by the front passenger, which can be air-conditioned, you have, for instance, a place to store pleasantly chilled refreshments during your travels.

Your comfort when boarding or leaving the car is enhanced by the front and rear **lighting of the foot area**, the mode and intensity of which can be individually configured.

The **230V socket** installed on the rear side of the Jumbo Box is suitable for laptop or DVD player cables, a mobile phone charger etc. This can also contain the **rear seat heating** buttons.

Ensuring a pleasant climate in the car interior is an easy task for the **Climatronic**, dual-zone air conditioning with electronic regulation, newly fitted with a humidity sensor, which reduces windscreen misting. The **USB/Aux-in connection**, located on the centre panel, enables you to connect an external appliance and control it with the radio, navigation system or multifunctional steering wheel buttons.

The Octavia model comes with **advanced technologies**, most notable in the engine selection. Most are offered as **Green tec**, featuring the **Start-Stop** system as well as **energy recovery functionality**.

The **automatic DSG** (Direct Shift Gearbox) creates excellent acceleration while keeping the engine in an optimum state. With economic driving, fuel consumption is kept low. Based on the specific engine version, you can choose between a 7-speed or a 6-speed version.

All **petrol engines** feature TSI technology and you will enjoy their dynamic character. Other advantages include lower weight and fuel consumption as well as CO<sub>2</sub> emission levels.

The whole range of **diesel engines**, supplied with the common rail fuel injection system, ensures high power and smooth running at exceptionally low fuel consumption.

The Octavia model brings along **assistance systems** offering unusual possibilities. They will, for instance, help you to avoid emergency situations or to mitigate the eventual consequences of such situations. Some assistance systems use the **multifunctional camera** on the windscreen below the internal rear-view mirror: Lane Assistant for keeping the car in the right lane, Intelligent Light Assistant and traffic sign recognition and display.

The functions of assistance systems using the multifunctional camera are displayed on the **instrument panel** in the driver's visual field. You can select the **Maxi DOT with a colour display**.

Providing you with comfort and orientation during a parking procedure is the primary objective of parking systems. The **Optical Parking Assistant\*** uses a camera located on the 5th door handle, monitoring the space behind the car and indicating the driving lines, based on the vehicle width. This assistant system is always supplied with parking sensors (Intelligent Parking Assistant) and a navigation system, which shows your progress during parking on the display.

The **button bar** is within easy reach of the driver's right hand. Based on the equipment level or engine type of the car, it contains the buttons for activation/deactivation of the central lock, Start-Stop system, Tyre Pressure Monitoring, ASR, Driving Mode selection, front parking sensors and Automatic Parking Assistant.

The **Intelligent Parking Assistant** activates an audible signal based on the assumed directional movement of the car for any relevant obstacles, so that it does not unnecessarily warn you about front placed obstacles when the reverse gear is shifted. But if you wish to make parking as easy as possible the **Automatic Parking Assistant** will be the best assistant for you. It will select an appropriate parking place, park in a row of parallel or perpendicular parked vehicles, and can even drive out of a row of parallel parked vehicles. In the case of parallel parking, it only needs a space 60 cm longer than the car itself. (The picture shows the Automatic Parking Assistant on the Amundsen+ navigation display.)

Your safety, mainly during long-distance travel at night, is also ensured by the **Driver Activity Assistant**, which evaluates details obtained from the steering servo unit at speeds exceeding 65 km per hour. When the assistant notes behaviour that might be a sign of driver's tiredness, such as more intensive driving direction corrections with the steering wheel, it recommends taking a break.

\* Available later.

The **leather multifunctional steering wheel** with chrome elements enhances your joy of driving the car. The top offer includes a **3-spoke sports steering wheel** version in perforated leather with controls for the radio, phone and the automatic DSG (Direct Shift Gearbox).

You can now enjoy an absolutely unique quality when listening to music or a spoken word on the **Canton Sound System** with ten speakers, including a central speaker and subwoofer in the luggage compartment, and with sound customised precisely to the Octavia car interior.

You will find the **Start/Stop button** on the steering console in cars equipped with the KESSY system (Keyless Entry, Start and exit SYstem). It enables you to start the car or stop the engine without using a key.

When driving on motorways or highways, you will appreciate the **Adaptive Cruise Assistant**, which besides the basic cruise control function, maintains a safe distance from vehicles in front of you. For its activity, this assistance system uses a radar device in the front bumper. The function is displayed on the Maxi DOT display.

Under the names of Blues, Swing and Bolero (see photo), we offer you an "infotainment radio" with an advanced menu and functions. Your radio becomes the basis for a **multimedia information system**, which is interconnected with the car itself. Thus you can use the radio to set the car menu. The **Bolero radio** has a very comfortable and certain touch control. The appliance not only registers a flying touch, but it also supports simultaneous touch on multiple functions.

The characteristic features of the **Columbus navigation system** always included fast route calculation and precise displaying. In addition, this top navigation equipment provides your car with the most attractive multimedia information system alternative. Thus Columbus enables you, among others, to access the car function settings. And last but not least, it also offers extraordinarily comfortable touch control on an 8" display, which responds to your hand only approaching the screen.

The **Phonebox**, located in the area in front of the gear stick, brings an amplified signal from the roof aerial to your mobile phone. It also serves as a safe place for storing your phone while driving.

A wide range of **safety** features provides certainty that you can rely on your car in extreme situations. There are as many as **nine airbags**, which offer protection for you and the passengers.

The standard equipment of all cars includes **ESC** (Electronic Stability Control), expanded, for instance, with the **multi collision brake**, which can avoid further uncontrolled movement of the car in a situation when one of the front airbags has been activated.

The safety level is significantly improved by **safety assistance systems** with progressive technologies, which appear in ŠKODA cars for the first time. Besides the systems mentioned on previous pages, we also offer the **Crew Protect Assistant**, which tightens the driver's and front passenger's seat belts in emergency situations, partially closes electrically-adjustable front windows, and eventually closes the sunroof.

Besides the crew protection, we also offer a number of elements for **car security** including the component protection system, which avoids the use of, for instance, control units, radios or navigation systems in other vehicles.

The **automatically retractable external rear-view mirrors** fold down when the car is locked, thus being protected against damage.

The **front and rear side airbags** are designated for pelvis and chest protection in case of a side impact.

The **rear Aero wiper** applies even pressure along its entire length. The car is also equipped with a front Aero wiper.

The **knee airbag** located under the steering console protects the driver's lower limbs.

The car can be equipped with an interior monitoring alarm system, horn with back-up power and inclination sensor. The possible **deactivation of the interior monitoring** will mainly be appreciated by dog owners.

The **safety lights** on the front door panelling draw the attention of passing drivers to the open door of a standing vehicle.

Enjoy your drive to the fullest. Fill your tank for half. The ŠKODA Octavia G-TEC.

The **ŠKODA Octavia G-TEC** is powered by CNG (Compressed Natural Gas), which promises a much greener alternative to conventional fuels. Being more than 90 % pure methane gas, CNG is lighter than air and disperses easily. More importantly, the growing popularity of this fuel has made it an increasingly common offering at gas stations. The **1.4 TSI/81kW G-TEC engine** declares its love for the environment by producing just **97 g/km CO<sub>2</sub>**, reducing nitrogen oxide emissions and emitting no solid particles.

Inside, two safely designed CNG tanks can carry 97 litres of fuel. To stretch driving flexibility we've also equipped it with a 50-litre petrol tank. In other words, you can travel non-stop for up to 1,330 kilometres, skipping all gas stations on the way.

The car is equipped with **automatic switching** between the two fuel systems. The green light on the instrument panel indicates the active CNG regime.

The on-board computer or **Maxi DOT display** (see photo) provides information concerning current and average consumption, the fuel level and outside temperature.

The **Start-Stop system** automatically switches off the engine when you are waiting at traffic lights or moving slowly in a queue of cars. The engine restarts once you push the clutch pedal. **Energy recovery functionality** further reduces engine load and increases fuel efficiency by utilising the car's kinetic energy for battery recharging.

The ŠKODA Octavia GreenLine vehicles are powered by the **1.6 TDI CR DPF/81kW diesel engine**, which on its own is already a guarantee of an economical operation yet a dynamic drive. The Start-Stop system, energy recovery functionality, tyres with low rolling resistance and specific modifications leading to a reduced drag resistance coefficient, such as lower chassis, help achieve a combined consumption of **3.2 l/100 km** at a CO<sub>2</sub> emission level of a mere **85 g/km**. The GreenLine version can be identified by the original badge on the front grille.

The reduced drag resistance coefficient of the liftback version is largely achieved by the **spoiler on the 5th door**. The **GreenLine badge** can also be found on the rear of the car.

Standard equipment includes **15" steel wheels with Sidus hub covers** and low rolling resistance tyres.

The GreenLine version may be equipped with **16" Lepus alloy wheels** (see photo) or **16" Velorum alloy wheels**. Both come with low rolling resistance tyres.

The **Start-Stop system**, which saves fuel by automatically switching off the engine when idle, can be deactivated with a button in front of the gear stick. The GreenLine version also features **energy recovery functionality**.

Exceptional concern for the environment. The ŠKODA Octavia GreenLine.

Unforgettable trips and new driving experiences. The ŠKODA Octavia 4x4.

The **automatic 6-speed DSG**, available with the 1.8 TSI/132kW engine, and the 4x4 drive represent two state-of-the-art technologies that in combination guarantee an extraordinary driving experience.

When you feel confident behind the steering wheel and know that you can rely on your car even in extreme conditions, you can truly enjoy the driving experience. Such moments await you with the **ŠKODA Octavia 4x4 version**, whether you go on unpaved or slippery streets or through serpentine mountain roads. The 4x4 drive is a great choice not only for adventurous drivers who crave driving off asphalt, but those who frequently tow a trailer will also appreciate its power. We offer 4x4 drive for Octavia in a combi version. You may select from three Green tec engines: 1.8 TSI/132 kW (petrol) and 1.6 TDI CR DPF/77 kW or 2.0 TDI CR DPF/110 kW (diesel).

The 4x4 drive is provided by an inter-axle **Haldex clutch**. The coupling of the rear axle is automatic, so under normal conditions the car can utilise the advantages of front-wheel drive, and under extreme conditions, the excellent traction of the 4x4 drive.

Tough combi for the wilder families. The ŠKODA Octavia Scout.

The **ŠKODA Octavia Scout**, confidently presents its off-road character. But its wild appeal applies not only to its robust exterior. The model is available exclusively with a 4x4 drive, so you can go off paved road without trepidation. There is a choice of powerful Green tec engines: 1.8 TSI/132 kW (petrol) and 2.0 TDI CR DPF/110 kW or 135 kW (diesel).

The robust spoiler with a silver protective cover on the **front bumper** gives the Scout a fierce look and also contributes to its aerodynamic properties. The front bumper features integrated **fog lamps in a Scout design**.

The **rear bumper** with a silver protective cover lends the car's body a tough appearance, which is further underlined by plastic covers on the wheel arches and door sills.

The **decorative door sill strips** with the Scout inscription are an original feature with aesthetic as well as practical functions.

The **17" Polar alloy wheels** come as standard.

Another attractive option are the **17" Nivalis alloy wheels** in anthracite (see photo) or silver design.

For detailed specification of the ŠKODA Octavia Scout models, please see the dedicated catalogue.

Dynamic driving as well as space for a family. The ŠKODA Octavia RS.

The **ŠKODA Octavia RS** uniquely combines a dynamic driving experience with all the characteristics of a practical family vehicle. It can be easily identified by the **RS badge** on the front grille as well as the ferocious sports expression lent by the **Bi-Xenon headlamps with LED daytime running lights and black backfill**, in combination with a **cellular grid in the front bumper**. The sports styling of your car can be further emphasised with the **black package**, containing external mirror covers, front grille frame and, for the combi version, roof railings in glossy black colour. The RS model is available with a high performance 2.0 TSI/162kW (petrol) or 2.0 TDI/135kW (diesel) engine.

The **decorative door sill strips** with an RS inscription accentuate the character of the model as well as increase its practicality. The Challenge package contains strips with a specific design.

The **18" Gemini alloy wheels in black design**, which further increase the attractiveness of the model, come as part of the Challenge package.

The rear of the RS model is dominated by **chrome exhaust pipe end pieces**, which are very effective and further accentuate the sporty look of the car. A pronounced taillight, improving the car's visibility, sits above the **massive diffuser**.

The **interior** can be in combination of leather/artificial leather (optional; see photo) with red or grey double stitching or fabric/leather/artificial leather (as standard) with red or grey stitching. The gear stick and the handbrake handle are covered in leather.

The **3-spoke sports multifunctional steering wheel**, wrapped in perforated leather with grey or red stitching and adorned with an original RS plaque, enables control of the radio, phone and automatic DSG (Direct Shift Gearbox). The **electromechanical power steering with variable transmission**, allowing for sporty driving as well as comfortable control in city traffic or while parking, demonstrates **advanced technology**.

The **instrument panel in the RS design** has a clearly legible white interface. The attractive **Maxi DOT colour display with a LapTimer** comes as part of the Challenge package.

The **noble steel foot pedal covers** are yet another stylish detail of the Octavia RS model.

All engines are exclusively available in **Green tec** version. When driving economically, you can achieve combined consumption of **6.2 l/100 km** with the 2.0 TSI/162kW petrol engine with a manual transmission and **4.6 l/100 km** with the 2.0 TDI/135kW diesel engine with a manual transmission.

For detailed specification of the ŠKODA Octavia RS models, please see the dedicated catalogue.

Everything done in style. The ŠKODA Octavia Laurin & Klement.

The **ŠKODA Octavia Laurin & Klement**, which represents the highest equipment version, has a generous range of equipment as standard. It provides exceptional comfort and captivates with original elements, premium materials and advanced technology. The version comes exclusively with high performance engines: 1.8 TSI/132 kW (petrol) or 2.0 TDI CR DPF/110 kW (diesel).

The **Bi-Xenon headlamps with LED daytime running lights** excel with brilliant luminous intensity and longevity. The **fog lamps with a Corner Function** can be used as highly efficient turning lights.

The elegant **brown leather interior** is lined with either an imitation wood (see photo) or a Piano Black décor. The steering wheel, gear stick knob and sleeve, as well as the handbrake handle, are also in brown leather.

The appeal of the vehicle is further increased by the **18" Turbine alloy wheels**.

The decorative **Laurin & Klement plaque** on the front mudguards forms an important design feature.

The **leather multifunctional steering wheel** allows you to control the radio and phone.

The **illuminated internal door handles** make exiting the car in the dark easier.

The **Elegance** equipment version comes in two standard interior colour versions. The first has black/black fabric seat upholstery and dashboard and door panelling also in a black/black combination. The second option has beige/beige upholstery and dashboard and door panelling in a black/beige combination. The interior is decorated with the Elegance decorative mouldings on the front and rear doors and a number of chrome elements on the steering wheel, vent frames, gear stick and more. We offer an imitation wood décor for the Elegance upon request.

With the **Ambition** equipment version you can choose from the following two alternatives: black/black fabric seat upholstery and dashboard and door panelling in a black/black combination, or black/grey fabric seat upholstery and dashboard and door panelling also in a black/grey combination. The interior is decorated with the Ambition decorative mouldings on the front and rear doors and a number of chrome elements on the steering wheel, vent frames, gear stick and more.

The **Active** equipment version is offered with black/black fabric seat upholstery and dashboard and door panelling in a black/black combination. The interior contains the Active decorative mouldings on the front and rear doors and other decorative elements, such as chrome door handles, polished vent frames and more.

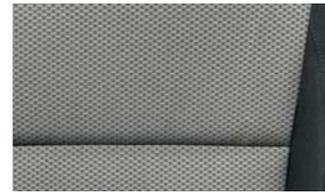

The **Dynamic** sports interior is available with red or grey fabric seat upholstery with either Onyx/Onyx or Onyx/grey dashboard. The sports interior is offered with a small leather package (3-spoke sports steering wheel, gear stick knob and handbrake handle).

\* Available exclusively for the Laurin & Klement version.  
\*\* Available exclusively for the GreenLine version.

The **sport package**, available from **ŠKODA Genuine Accessories**, consists of the front bumper spoiler, rear bumper spoiler, 5th door spoiler for the liftback version or roof spoiler for the combi version and decorative lateral strips. We recommend to combine it with the 18" Turini alloy wheels in matt black design and a decorative strip of the front bumper in glossy black colour.

The 15-litre capacity **thermo-electric cooling box** enables you to primarily keep food fresh and refreshing. The cooler can keep items cool up to 20° C below the ambient outside temperature. Switching it to a thermobox gives you heating power of up to 65° C.

A **bicycle carrier for a tow bar** will enable you to safely transport two bicycles.

The **ISOFIX DUO Top Tether child seat** will ensure extremely safe and comfortable travel of your little passengers, as besides the standard Isofix fasteners it is also fixed using the Top Tether system on its rear side. The seat offers three adjustable positions (sitting, resting, lying) and is designed for children whose weight ranges from 9 to 18 kg.

The **plastic boot dish** in the luggage compartment comes in handy when transporting things that might make your upholstery dirty.

You can securely attach other racks and holders from the **ŠKODA Genuine Accessories** range, such as a bicycle carrier, luggage basket, ski or snowboard rack or box and others, onto the **basic roof rack**.

## General information

### ŠKODA Service

Put your car in good hands. We give you good reasons to choose an authorised ŠKODA service partner.

#### **We offer you first-class quality**

Your car requires advanced technology. All the authorised ŠKODA service partners have special tools and quality diagnostic systems at their disposal to ensure the perfect functionality and reliability of your car.

#### **Professionally trained staff by the manufacturer**

The ever-rising standard of the technology used in our cars requires corresponding professional qualifications on the part of the staff. To meet this requirement, the manufacturer organises regular training for the authorised ŠKODA service partners in order to provide them with up-to-date information important for their activities.

#### **Our motto: be fair and open with our customers**

Careful, professional and friendly counselling for the customers upon acceptance of orders is just as important to us as diligence and completeness with respect to repairs and maintenance work. All this is continuously monitored by internal quality control.

#### **Comprehensive range of services:**

##### › **Service inspections**

The authorised ŠKODA service partner guarantees the performance of regular service inspections in accordance with the manufacturer's instructions and ensures the long-term functionality of your car. The service schedule informs you when the service inspection must be done.

##### › **Body and paintwork service**

Damage to the body and painted areas will be fixed by your authorised ŠKODA service partner in an expert manner, in accordance with the manufacturer's instructions, using ŠKODA Genuine Parts. This is important not only for your safety, but also for functionality and maintaining your car's value.

##### › **Courtesy car**

The authorised ŠKODA service partner can provide you with a courtesy car for the period of repair or service inspection.

##### › **Pick up and delivery service**

If you are unable to take your vehicle to the ŠKODA Service, an authorised ŠKODA service partner will arrange a date with you to pick up the car. The car will be delivered back to you after the service work has been completed.

The listed services represent only part of the wide range of ŠKODA Service offers, which may vary from country to country. Please contact your authorised ŠKODA service partner for further details.

### ŠKODA Applications

#### **ŠKODA Service App - ŠKODA Service in your pocket**

The ŠKODA Service application is designed for smartphones operating on iOS and Android systems and its purpose is to help ŠKODA customers in any difficult situation they may encounter on their travels.

#### **ŠKODA Manual App - know your vehicle**

The ŠKODA Manual application is aimed at users of tablet PCs who

are interested in ŠKODA vehicles or already own one. The application contains a full featured digital version of the owner's manual for all current ŠKODA models.

### ŠKODA Genuine Accessories

ŠKODA Genuine Accessories offer you a wide assortment oriented to five main product groups (sport and design, music and communication, comfort and utility, transport and safety) and bicycle products. For more detailed information on the complete ŠKODA Genuine Accessories range see the individual ŠKODA model catalogues.

### ŠKODA Genuine Parts

#### **Safety**

ŠKODA Genuine Parts are identical to those used in the assembly of ŠKODA vehicles. The use of first-class materials and technologies guarantees safe and worry-free motoring.

#### **Availability**

ŠKODA AUTO offers a complete range of parts and equipment items used in the vehicle's series production and does not merely focus on high-turnover parts. Our objective is to secure ŠKODA Genuine Parts supplies essential for the operation of the vehicle for a period of 15 years after the end of the model run.

#### **Long service life**

The use of first-rate materials and manufacturing technologies applied in the production of ŠKODA Genuine Parts ensure their maximum reliability and long life. As proof, we have extended the genuine batteries warranty to three years.

#### **Environment protection**

The ŠKODA Genuine Parts range includes exchange parts, which are manufactured with a low environmental impact in terms of waste, excess heat and water contamination.

### Information on the internet

Information is available at [www.skoda-auto.com](http://www.skoda-auto.com) to assist you in deciding which vehicle suits your needs, thanks to the detailed descriptions and photographs of all our models. Visit [www.facebook.com/skoda](https://www.facebook.com/skoda) and become a fan of ŠKODA to receive the latest updates and get in touch with our community.

### ŠKODA Finance

ŠKODA Finance provided by ŠkoFIN offers solutions for both individuals and businesses. Purchase your car with favorable conditions without additional costs. You can learn about the current credit or lease offer through any authorised ŠKODA partner.

### Global fleet

The ŠKODA AUTO Global Fleet Services offer B2B fleet solutions to customers with all kinds of requirements. A fleet made up of ŠKODA cars offers unmatched roominess, long-lasting quality, safety, low total costs of ownership and as a result excellent value for money. You can find more information about our products and services at [www.skoda-auto.com/fleet](http://www.skoda-auto.com/fleet).

One of the most important goals of ŠKODA AUTO is the development and manufacture of products that are as environmentally friendly as possible throughout their life cycle phases, placing principal emphasis on the selection of recyclable materials. Our ŠKODA cars are produced using progressive types of technology in modern production facilities that meet the strictest criteria. Anticorrosive protection of the cars' painted parts is based exclusively on lead-free cathaphoresis (KTL) and water-soluble paints.

Our company strategy includes limiting fuel consumption and emissions. As a result, the engines we offer meet the current emission regulations. All ŠKODA products are made using manufacturing processes that adhere to the laws and regulations concerning the protection of soil and water. As a result of these activities, ŠKODA cars meet technical, safety, quality and environmental requirements. ŠKODA AUTO contributes to the preservation of a clean environment and provides mobility and comfort to its customers.

The environmental logo expresses ŠKODA AUTO's awareness of, responsibility for and attempts at the sustainable development of the company and a friendly approach to life and nature.

Download the ŠKODA Interactive Catalogue and explore the car from every angle.

Some models in this catalogue are shown fitted with optional or extra equipment not necessarily included in the standard equipment. All details of technical specifications, design, equipment, materials, guarantees and appearance were accurate at the time of going to print. However, the manufacturer reserves the right to make any changes without prior notice. The information included in this catalogue is for guidance only. Due to printing technology limitations, the colours of paints or other materials shown in this catalogue may differ from reality. For up-to-date information and further details on standard and optional equipment, current prices and delivery terms and conditions contact your authorised ŠKODA partner. This catalogue was printed on cellulose paper which was bleached without using chlorine. The paper is 100% recyclable.
